

Flat Rate Electricity Policy

All full-time tenants are subject to flat rate electricity charges for the privilege of using shore provided power in the Noyo Harbor mooring basin. Flat rate charges are subject to change as fluctuations in the utilities price occur over time.

Flat rate charges will be added to the tenants bill on the first of every month and applied to their power usage in that month. Vessel owners are responsible for communicating with the office if their vessel will not be in the slip for that month or for an extended period.

Vessel owners that pay annually can also pay their electricity charges annually and those payments are due at the same their annual payments are due. If a vessel is out of the water for a certain percentage of the year that can be adjusted into the flat rate charges.
